Characteristics

100% cotton lightweight knitted glove.
Elastic cuff, 6cm.
Gauge 13: light.
Length: 23cm.

Advantages

COMFORT

The knitting technique helps to obtain a glove that conforms snugly to the hand and good dexterity. The glove offers maximum comfort and added sturdiness.

Of a neutral pH level and without any treatment, this cotton is tolerated perfectly well by the skin. It limits the absorption of perspiration, has no static and pills very little.

The tight knit gives the glove perfect support, limits the penetration of dirt, offers a good touch while offering protection against small cuts.

HYGIENE

Its light colour enhances the glove's hygiene and cleanliness properties.
