Product Use :

DuraMaxx is the first high performance goggle for which wearers will not compromise

The DuraMaxx™ goggle provides wearers with a wide range of premium comfort and performance benefits. Its low-profile design and toric lens provide superior optics and unobstructed vision, while it's soft, elastomer body flexes and conforms to the face for a comfortable, gap-free fit. DuraMaxx is an OTG goggle which fits over most prescription spectacles comfortably. Also, it is designed so that the goggle body does not push on the temples of the prescription frames or grab the spectacles upon removing the goggle. The goggle features exclusive Sperian coating technologies and an indirect venting system combined to minimize fogging to keep lenses clear and workers safe. DuraMaxx goggle lenses come standard with Dura-streme™ coating technology (new from Sperian!). Dura-streme™ technology delivers tough, anti-scratch coating on the outside, and anti-fog coating on the inside, for lenses that last up to 3x* longer. DuraMaxx has a large adjustable headband, an easy, economical lens replacement system, and can be worn comfortably with prescription frames and half-mask respirator.

Shade 5 lens is ideal for welding applications such as oxy-cutting, gas and welding.
