

Hot Glove Plus[™]

Hot Glove Plus[™] is a heavy duty terry cloth gauntlet with an integral liquid and steam barrier. Achieving Level 2 for contact heat in accordance with European Standard EN407, it can withstand temperatures of up to 250°C providing a high level of protection against heat. With an integral PVC barrier to protect from liquids and steam, the heavyweight terry cloth shell offers good mechanical protection and increases durability. The Hot Glove Plus[™] is also ideal for use with Polyco's Fusion[®] glove. The Fusion[®] is a polyamide melt resistant disposable that can be worn over the Hot Glove Plus[™]. It can withstand temperatures of up to 200°C without melting, and is suitable for food contact thereby increasing the range of applications that the Hot Glove Plus[™] can be used for.

Typically used for:

- Bakery Work
- Food Manufacturing
- Confectionery Manufacturing
- Autoclave
